NON-SAP Projects:

Milk Production, Sales & Distribution System

This system was developed to handle sales, production & distribution of milk through Transporter/Distributors. It included preparation of delivery challans & route charts for different routes for every transporter/distributor and setting up of targets, handling of sales schemes, analysis of sales, discount, target, demand summary and crate accounting. Production system includes milk receipt register, MRN for store stock, stock adjustment, stock ledger.

Contribution - Responsibilities included designing, coding and implementation.

Environment - Visual Basic, MS - Access

Human Resource & Payroll System

This system was developed in extension to the existing payroll application. The HRD system generates various reports including salary review report, average increment of employees, level wise summary of manpower, age mix & qualification mix of employees, gross emoluments of employees etc. The payroll application calculates the salary of all the employees taking care of various factors like P.F., pension fund, loans, leave without pay, half pay leave and income tax.

Contribution- Responsibilities included designing, coding, implementation and maintenance.

Environment - Developer/2000, Oracle, PL/SQL

Sales And Branch Accounting System

This system was developed to handle the stock movements, billing/invoicing & realization through the Zonal offices, C&F agents' offices and wholesaler/party. The system contains several different modules including Indents, Stock Requisition Advice, Stock Transfer Advice, Billing Advice, Invoicing, Internal Consumption & Branch Receipt & Transfer. The system has the provision of collection & adjustment of the sales proceeds against local invoices raised at various zonal offices.

Contribution - Responsibilities included coding & implementation at Zonal & C&F Agent offices.

Environment - Visual Basic, MS - Access

Anant Billing System

This system was developed to handle the invoicing/billing of the showroom and to keep track of the stock movements. The system generates purchase order, handles breakage and also generates different reports on design, item, supplier, category etc. basis.

Contribution - Responsibilities included coding and implementation at Anant Art Gallery.

Environment - Visual Basic, MS - Access

Loan Accounting System

This system allows the user to record all loans given against provident fund account of the employees. The loan EMI is calculated at the rates applicable for the different period of time on the basis of refundable period. All the MIS reports like loan register, loan recovery and loan sanction are generated by the system.

Contribution - Responsibilities included designing, coding and implementation.

Environment - Developer/2000, Oracle, PL/SQL

Inventory Control System

This system caters all parts of the inventory system such as stock accounting, vendor information, customer information, sales order processing, purchase order processing, order confirmation, goods dispatched note, goods receipt note, material rejection note, etc. The system also generates reports for various management levels including details of production, consumption, sales.

Contribution - Responsibilities included coding and re-engineering.

Environment - Visual Basic, MS - Access

Warranty Analysis & Quality Problem System

This system was developed for the detailed analysis of warranty given on the various automobile parts supplied to different vendors and on quality problems occurred in such parts to the management. The system has the provision for generation of summary & detail reports on the basis of different category, vendor, part etc.

Contribution - Responsibilities included designing and coding.

Environment - Developer/2000, Oracle, PL/SQL

EDUCATION

CDAC

SKILLS

ABAP, SAP, ABAP/4, ORACLE, R/3
