WORK EXPERIENCE

Senior .NET developer/

INGENIOUS MED - Atlanta, GA - February 2015 to Present

Senior .NET Full-Stack developer/Architect in Hospital Management project. Full-stack developer for a Hospital management web application using C#, ASP.NET MVC5.

- = Involve in requirement analysis, designing and development.
- = Use AGILE/SCRUM methodology to implement the application.
- = Active participation in Planning meetings, Retrospective meeting,
- = Time estimation for the task
- = Handled task status through TFS
- = Designing web application using ASP.NET MVC5 and C# and JQuery.
- = Use front end web development tools like CSS, Bootstrap, JavaScript, HTML, and JQuery.
- = Designed and created Sql Server Tables and stored procedures
- = Developing/Designing Webservice to get data from different environment
- = Developed/Designing new modules for existing website
- = Worked on performance enhancement of existing modules
- = Involved in testing and fixing the issues occurred in the testing process.
- = Used TFS for version control.

Key Technologies: .NET 4.5, C#, MVC5, JQuery, JavaScript, Bootstrap, HTML, CSS, Json, Sql Server

Senior .NET developer/Architect

SOUTHERN COMPANY - Atlanta, GA - February 2015 to February 2016

in Summary Billing project. Independent full-stack developer for a new web application using C#, ASP.NET MVC5. Worked on couple of other enhancement projects (eStar, Payroll).

- * Responsible for gathering requirements, getting sign-off from the business users and prepare system requirements specification for the solution.
- * Designed and developed (single member) new .NET web application using ASP.NET MVC5 and C# and JQuery.
- * Designed project architecture using Dependency Injection (Unity) design pattern.
- * Used front end web development tools like CSS, Bootstrap, JavaScript, HTML, and JQuery.
- * Designed and created Oracle database and Tables.
- * Developed Rest Service using ASP.net Web API
- * Developed new functionalities for an existing Payroll website
- * Involved in testing and fixing the issues occurred in the testing process.
- * Used TFS for version control.
- * Provided support and also involved in maintenance process.

Senior .NET

Key Technologies - Alpharetta, GA - September 2014 to February 2015

NET 4.5, C#, Web API, MVC5, JQuery, JavaScript, AngularJS, Bootstrap, HTML, CSS, Json, Oracle
GRIFFIN SOLUTION, ALPHARETTA GA September 2014 - February 2015

Senior .NET web developer in real-estate project. The projects goal was to deliver mobile friendly version of website. Team Size: 7

- * Involved in requirement analysis, designing and development.
- * Used AGILE/SCRUM methodology to implement the application.
- * Used .Net framework 4.5, n-tier architecture and Object Oriented Methodologies for application development.
- * Developed the Web Application in ASP.Net 4.5 using MVC5 and C#
- * Used front end web development tools like CSS, JavaScript, HTML, and JQuery.
- * Payment gateway integration using FirstData
- * Involved in implementing the logic using C# and oops concept.
- * Designed and Created SQL Server Database Tables
- * Used Entity Framework to connect SQL server db
- * Used LINQ to manipulate and fetch the data from database.
- * Involved in testing and fixing the issues occurred in the testing process.
- * Used TFS for version control.
- * Provided support and also involved in maintenance process.

Key Technologies: .NET 4.5, C#, XML, HTML, CSS, ASP .NET MVC5, Entity Framework, LinQ, JavaScript, JQuery, Bootstrap, Json, MS SQL Server 2012

Senior .NET developer in Envision

THOMSON REUTERS - Rockville, MD - February 2014 to September 2014

Wells Fargo) project. Mostly was responsible for Front-End development and Report Creation

- * Used front end web development tools like CSS, JavaScript, DHTML, and jQuery.
- * Application enhancement task and bug fixes
- * Created reports using XSL and integrated with application
- * Designed and Created database objects such as stored procedures, functions, and views for reports.
- * Fixed the issues occurred during testing process.

Key Technologies: ASP .NET MVC4, MS SQL 2008, C#, XML, XSL, HTML, CSS, JavaScript, JQuery, Json, AngularJS

Team Lead/ Senior .NET developer

EQUIFAX - St. Louis, MO - June 2013 to February 2014

in I-9 Reporting Project. Single Page Application using MVC4. Backend development based on SOA (Service-Oriented Architecture) using Web API. Agile development process was used with two weeks iterations.

- * Lead an offshore team (5 members) and assigned task for the team members
- * Active participation in Scrum meetings
- * Active participation in Planning meetings, Retrospective meeting,
- * Time estimation for the task
- * Updated task and team status
- * Handled task status through TFS
- * Developed SPA using MVC4 and JQuery and ADO.Net
- * Implemented Dependency Injection using Unity4
- * Developed dynamic subscription for SSRS report
- * Designed and Created database objects such as stored procedures, functions, triggers and views
- * Developed different module for Report subscription
- * Monitored the project flow and creating burn down chart

- * Discussed business solutions with client business team, resolved existing problems and improving the application stability.

Team Lead/ Senior .NET

Key Technologies - February 2010 to June 2013

ASP.Net, C#, MVC4, Web API, JQuery, Ajax, MS SQL SERVER 2008, SSRS

KPMG, NEW JERSEY February 2010 - June 2013

Team Lead/ Senior .NET developer I was working on a suit of 6 applications. Main responsibilities were:

- * Managed, maintained, developed and deployed applications and databases in response to business needs.
- * Wrote application code
- * Database Design with ER diagram
- * Agile scrum methodology
- * Actively participated in Scum meeting, Planning meeting, Retrospective meeting and Task estimation
- * Application enhancement task and bug fixes
- * Created reports using SSRS and integration with application
- * Data migration using SSIS
- * Daily call with Onsite members.
- * Monitored the project flow and creating burn down chart
- * Analyzed software specifications and identification of the Support application functionalities for design, development and testing.
- * Performed RTB (Run the Business) activities, i.e. fixing all the application related issues and bugs that may come up during the production phase. This also includes helping the application users in understanding the application and setting up the environment for them to make the application up and running.
- * Provided production support - data warehousing activities, such as data mining, report creation that assist in business decision, monitoring day-to-day processes, timely fixing production problems encountered, performing data fixes, executing Month/Quarter/Year End batch processes & troubleshooting issues for business users and business analysts.
- * Discussed business solutions with client business team, resolving existing problems and improving the application stability.
- * Coordinated with business clients, supporting the application and implementing the process as per specifications provided.
- * Performed requirements gathering and analysis, estimating time required for project completion, preparing schedules, design documentation, design reviews and development, testing and deployment of application enhancements, as well as project planning.
- * Reviewed work products and deploying the application in the test environment and initiating the process of user acceptance testing. It includes fixing of bugs and technical errors that may come up during this phase.
- * Supported the system components during system testing, integration testing and during promotion of these components to production environment

Key Technologies: ASP.Net, C#, JavaScript, Ajax, VB 6, Excel macro, ASP, SSRS, SSIS, MS SQL SERVER 2005/2008, ADO.Net, Entity Framework

Senior .NET Developer in IT

GLOBAL INFONET - October 2008 to February 2010

department. Worked for different US clients (Crowly, NationalParts and ISG). The list of my responsibilities below:

- * Actively involved in requirement gathering and analysis.
- * Architect and implemented the web application framework using ASP.Net and C#.
- * Designed the SQL Server database structure & written stored procedures, functions using T-SQL.

- * Customized various controls for Application by developing Custom Controls and User Controls for consistent look and feel.
- * Written Master Page and implemented the same template throughout the application.
- * Written Themes to make the similar look and feel across all web pages and CSS files to make the font size and style consistent across the site.
- * Involved in designing and documentation of application flows and developed functional diagrams using Visio.
- * Responsible for work distribution among team members.

Key Technologies: .NET 2.0 / 3.5, ASP.NET, MVC, JavaScript, HTML, CSS, SQL, XML, WCF, LINQ, Web Services, IIS, , Microsoft Enterprise Library

Senior Software Engineer

ART TECHNOLOGIES - January 2007 to October 2008

my role was to develop, test and deploy online shopping websites for various clients. My main responsibilities included:

- * ASP.net Application design and development
- * UI design using HTML and CSS
- * Designed and Created database objects such as stored procedures, functions, triggers and indexes
- * Direct interaction with clients.
- * Integrated payment gateways (PayPal, Monaris) for shopping sites

Key Technologies: .NET 2.0 / 3.5, ASP.NET, ADO.Net, JavaScript, HTML, CSS, SQL, XML, WCF, Web Services, IIS

Software Developer

LITEBREEZE - May 2005 to December 2006

My main responsibilities included:

- * Application Development using ASP.Net & C#, JavaScript
- * UI design
- * Developed various reusable User Controls using ASP.NET controls.
- * Created stored procedures

Key Technologies: .NET 1.1 / 2, ASP.NET, ADO.Net, JavaScript, HTML, CSS, SQL Server 2000 IIS

EDUCATION

Master's in Computer Application

MADURAI KAMARAJ UNIVERSITY - Madurai, Tamil Nadu
2004

SKILLS

Asp.Net (10+ years), C# (10+ years), mvc (5 years), JQuery (7 years), angularjs (2 years), sqlserver (10+ years)

ADDITIONAL INFORMATION

Key Skills

Core Programming Languages:

C#, SQL, JavaScript, VB.NET

Databases:

MS SQL Server 2008/2005/2000, ORACLE, MS Access

Technologies and Frameworks:

.NET Framework (1.1-4.5.1), ASP.NET, MVC4/5, WB API, WCF, WebService, ADO.NET, Entity Framework, AJAX, jQuery, AngularJS, JSon, HTML, CSS, XML, SSIS, SSRS, LINQ

Development Methodologies:

Agile development, Scrum, Test Driven Development, Waterfall
