Professional Summary:

I am an ambitious and a solution-oriented **Project Management Professional (PMP)** and **VITA (Virginia Information Technologies Agency)** certified Project Manager as well as a **Certified Scrum Master (CSM)** with a long track record of exceeding set targets in the field of **Software Project/Program Management**, Execution, Validation and Implementation. Most of my experience is deeply rooted in Software Application development and delivery in **Retail, Insurance, Taxation and Banking Domains**. I have broader exposure to traditional **Waterfall as well as Agile development methodologies**. I am a quick learner and strive continuously in learning and understanding upcoming trends as they emerge.

Key Experience Summary:

Proven record with **Technical Leadership, IT Project Delivery, Engagement Governance** and **Stakeholder Management.**

Strong background of Analysis, Design, Development, Testing, Implementation and Maintenance of business-critical software applications.

Driven JAD sessions, Design Reviews, Business Assurance Testing Strategy definitions, User Acceptance Testing, Production Implementations & Post Production support.

Defined **Service Level Agreements (SLA)** for IT Operations with the key stakeholders. Participated in various solutions designing for Proposals with bid value up to \$19 Million.

Worked on Business Development opportunities, RFP responses, Proposal Presentations, Statement of Work creations, Resource Fulfillment and Hiring processes.

Manage Customer Relationships for the Engagements at VP / Director Levels ensuring their Goals & Objectives are being met with the planning and deliverables across various LOB's.

Driving strategic **Monthly/Quarterly Business Reviews with Senior Leadership Team** in reviewing the healthiness of Engagements.

Efficient **Project & Team Management** containing multi-disciplinary skill-set at various experience levels including Employees, Contractors & Customer Associates.

Experience in managing a global team of up to 100 resources spread across geographies spanning multiple engagements.

Supported **Waterfall** and **Agile delivery methodologies** and participated in delivery transformation initiatives, thereby implementing **Feature-driven Agile solutions**.

Conducted **Sprint Retrospectives** to review the effectiveness of Development as well as **Quality Assurance Strategies** and optimize project execution with recommendations for betterment.

Excellent Oral & Written Communication Skills and tremendous Soft Skills helping towards building successful partnership with everyone.

Excellent analytical, problem-solving, decision-making and presentation skills with ability to co-ordinate activities in a fast-paced team environment.

Responsibilities As a Project Manager in the Division of Information Systems	Responsibilities	As a Project Manager in the Division of Information Systems
(DIS), apart from managing multiple small-scale projects, took		(DIS), apart from managing multiple small-scale projects, took

the bottom-line responsibility for the successful and timely delivery of the BIS Development Project, in a fast-track mode.

Liaised with the project teams and the business stakeholders from the Office of Background Investigation (OBI), in order to collaborate with them to provide business values through innovative IT solutions.

Coached the project teams to resolve conflicts, remove impediments, and meet output targets, by introducing new working models, like **Testing PODS**, that resulted in tremendous **improvements of Team Productivity**.

Played a vital role in supporting the Management in implementing new concepts including **Agile Framework** and Team Group Forums for Knowledge sharing.

Actively participated in Agency-level activities including hiring new talents, conducting Knowledge Sharing Sessions for Business Analysts and other team building activities.

Dueinet	Auto Incurence Dedecine (AID) Comising
Project	Auto Insurance Redesign (AIR) - Servicing
Employer	United Services Automobile Assurance (USAA), San Antonio, TX
Duration	Nov 2016 to July 2017
Role	Sr. Development Product Owner
Project Description	Property and Casualty (P&C) Innovation and Development team is responsible for any new development, enhancement, maintenance and support of Policy Administration System (PAS) which is the primary application for conducting all the Personal Lines of Insurance Business (Homeowners, Fire and Renters Insurance). AIR-Servicing project focuses on providing simple self-service capabilities, relevant and personalized advices to all the policy holders, via the available digital media, thereby enhancing the ability for digital members.
Responsibilities	As a Product Owner, worked closely with the PAS Development Team as needed and helped them reach their highest potential, while setting the direction for the project delivery. Managed Product Backlogs for the Sprint Teams and ensured the user requirements and defects are prioritized, addressed and refined into actionable user stories. Liaised with the project team and the business stakeholders, in order to define and refine the vision, scope and the value of the

product deliverables to the team in a manner that sparks innovative thought.
Coached the team to resolve conflicts, remove impediments, and meet output targets by holding daily standup meetings, participating in Spring planning, Retrospectives, demos, and other Scrum related meetings.
Mentored and provided guidance to other Scrum Teams to ensure that they are practicing the core agile principles of collaboration, prioritization, team accountability and visibility.

Project	Advantage Revenue (AR) /TACS/KFI Application Maintenance
Employer	Department of Taxation, Commonwealth of Virginia, Richmond,
	VA
Duration	Nov 2015 to Nov 2016
Role	IT Technical Manager
Project Description	The main objective of this assignment is to implement the large-scale Legislative and Non-legislative Enhancements associated with the Virginia Department of Taxation's primary application, the Advantage Revenue (AR), which is also the commonwealth's taxation accounting system of record as well as Application maintenance and enhancements for TACS/KFI Systems. These enhancements include those related to Application Security Enhancements as well as Version Upgrades.
Responsibilities	Responsible for planning, developing, and implementing AR Application changes and version upgrades to TACS/KFI Applications, to support any regulatory as well as administrative functions, to keep current with the Federal, State and other Regulatory requirements. Provided first-level end-user support for problems, reported by
	the users and coordinate activities of the Development Team and worked closely with Team Leads and Architects to prioritize the work and assign the projects.
	Oversee the development, collection, signoff and maintenance of artifacts in support of the tax agency's business processes , to ensure proper documentation.
	Ensured the program activities operate within the policies and procedures of the Commonwealth of Virginia (COVA) Standards and Guidelines.
	Supervise the day-to-day activities of a cross-functional team of around 15 full time employees and responsible for their

professional development and semiannual performance
evaluations.

Project	Implement BKFS Empower Application for Mortgage Origination
Client	Sun Trust Banks, Richmond, VA
Duration	Mar 2012 to Oct 2015
Role	Senior IT Project Manager
Project Description	The project focuses on replacing the existing Mortgage Origination system with a new Loan Origination Platform, Empower LOS, which is a vendor-hosted product. This new platform provides improved data integrity as well as security to overcome compliance challenges, while enabling a reduction in errors and improve turn-around times through efficient end-to- end loan origination processes.
Responsibilities	As a Senior Project Manager, responsible for construction and maintenance of \$19 Million project plan, defining project priorities with inputs from stakeholders, mitigating project risks, leveraging and cultivating project resources. Spearheaded the development of technical 'roadmap' for strategic planning purposes and collaborated with multiple project teams including the vendor resources from BKFS, Architects, Business SMEs and other stakeholders to ensure efficient co-ordination of the team. Facilitated improvement to project management processes and PMO skill growth, through sharing expertise in Software Quality Assurance and Project Management methodologies and techniques. Actively contributed to the client's agile and lean community (in the form of 'Application Testing Pods') and also made all efforts to keep the rest of the project network aware of the agile practices
