Rakib .Net

.Net Lead/.Net Architect

Dallas, TX 75202
rakibnet5_6qv@indeedemail.com - 202-798-5751

• Around 14 years of experience in Microsoft Technologies Web development using ASP.NET, C# , JQuery, Java script, angularJS, AJAX, XML, Web Services (asmx), IIS, CSS, MVC, WCF, Entity Framework, Enterprise Library, Razor View, SQL Server 2000/2005/2008/2012, XMAL, NuGet, Unity and Ninject, CSS

• Strong knowledge of Web Services Architecture (.Net based XML web services exposing backend database/ storage components) and RESTful application architecture utilizing .Net WCF platform (creating data driven service and operations contract and consuming through Ajax invocation, JSON serialization etc.)

• Strong knowledge of Microsoft T-SQL and Oracle's PL/SQL , schema construction and data manipulation techniques (i.e. various flavors of joins, Sub queries, Common Table Expressions, Table Value Functions, Pivoting, Programmable objects, Cursors StoreProcs and Triggers etc.)

• Strong architecture knowledge of database object modeling utilizing Linq, database component construct utilizing ADO.Net and data manipulation and transformation utilizing various flavors of .Net technologies (Linq to XML and vice versa, Linq to Sql/Object, Linq/ADO.NET to Entity Framework etc.)

• Strong knowledge of MVC framework, 1) rapid MVC data access layer deployment with Entity Framework Code First approach utilizing both LINQ and Lambda expression, seed data population etc.2)Route creation and route data manipulation techniques, 3)utilizing AJAX and JQuery features to create better throughput and cleaner code infrastructure compared to typical ASP.Net page code base.

• Experience with Restful application development and including JSON to Object Packaging and Ajax and JQuery for client side call processing,
• Experienced with the entire Software Development Life cycle (SDLC) process including requirement analysis, conceptual and detail design, development, verification and testing. Experience in Agile software development.

• Proficient in OOP concepts including Dependency Injections and Inversion of Control and test driven code development

• Experience in deploying web applications in QA and Live servers (in both Java and .net platform)

• Extensively use of Data grids, Data Readers & Dataset for data manipulation.

• Expertise in N-tier Web Development analysis, implementation, interfacing/reporting, data migration and troubleshooting. Extensive work in Developing web forms, web controls, and user controls in asp.net

• Developed project relevant documents like Software Requirement Specifications, High level design, Low level design, Technical Architecture, Unit Test plans, System Test plans, Project Release notice, Checklists for coding and reviewing, Coding standards, Project induction manual, Project plan, Statement of Work.

• Participated in various development projects across locations including Service Oriented Messaging Platform, HealthCare Provider Search Engine, HealthCare Cost Estimation Tools, derivatives pricing and trading

application, Front to back office work flow automation, analytics, financial simulation and scenario analysis software, payment processing integrated large e-commerce applications etc.

• Participated in the development and implementation of JPMorgan's next generation Futures & Options trading platform in Asia Pacific which involved building trading systems and various other front to back automation vis-à-vis different Asian Stock Exchanges.
• Participated in platform integration, legacy application migration(code conversion, data schema migration), IT internal control and regulatory compliance conformance in complex merger acquisition scenarios (i.e. JPMorgan Chase merger in Asia-Pacific, Archway and Storecast in USA)
Authorized to work in the US for any employer

ADDITIONAL INFORMATION

Technical Skills

Languages C#, Java, Ruby, Visual Basic, Angular JS
.Net Technologies ASP.Net, WCF, AJAX, LINQ
Web Technologies Asp.Net, XML, HTML, JavaScript, JQuery, CSS, Ember
Framework .Net 1.0, 1.1, 2.0, 3.5, 4.0, Spring
Application/Web Server IIS 6/7, apache/tomcat
IDE Tools Visual Studio 2003/2005/2008/2010, intelliJ, Eclipse
Databases SQL Server 2000/2005/2008/2012 R2, Oracle 11
Architecture Entity Framework, MVP, MVC, Factory Architecture, REST
Database Tools Enterprise Manager, SQL Server Management Studio, PL/SQL Developer,
Version Control Tool TFS, GIT
Operating System Windows, LINUX, UNIX
