Manufacturing Visibility to Drive Perfection

Position: MES Project Manager
             MES Requirement Analyst
             MES Solution Architect Manager

Location: Shanghai, China

Job Description:

Epic Data International Inc. has been a leader in industrial manufacturing management system for 36 years and is headquartered in Vancouver, Canada.

Epic Data provide sales, implementation services and ongoing support for installations from offices in Canada, the United States, the United Kingdom and China. Epic Data has developed and implemented its Manufacturing Execution Solutions (MES) products along with a broad range of customer specific software and hardware solutions for customers in manufacturing and warehousing. Many of our customers leaders in their industries – aerospace & defense, automotive, construction machinery and shipbuilding.

Now, as a new dynamic growing company with operations in Shanghai China, Epic Data will provide you with valuable work and career experience, with an excellent team focused on manufacturing in China to provide the best solution for our customers.

We are looking for three individuals to meet the needs of our customers in Aerospace, Marine Engineering and Ship Building, Automobile, or Engineering Machinery and Equipment manufacturing industries. Direct experience in MES Project Management, or MES Requirements Analysis or as a MES Solution Architecture in these sectors is desirable.

Duties & Responsibilities for each position may include:

- To develop Manufacturing Operations Management (MES), WMS, MRO, and ERP solutions to meet Customer needs
- To manage the implementation of MES projects
- Support of the sales and project implementation teams
- Work with the teams to deliver system solutions for its customers and participate in the entire sales cycle from pre-sales support through deployment of the customers solution
- Participate in sales presentations as a Subject Matter Expert (SME)
- Participate in the preparation of sales proposals
- Facilitate customer workshops to discover and document customer requirements
- Lead customer design sessions to formulate and document customer solutions
- Be the SME for the development and deployment phases of the project
- Participate in the development of business test cases and solution testing
- Provide onsite customer training
- Provide market driven product requirements to internal teams

The ideal applicant is also:

- Excellent presentation and facilitation skills
- Able to work independently and efficiently to meet deadlines
- Able to multi-task multiple priorities in a fast-paced environment
- Self motivated, detail-oriented and excellent organizational and time management skills
- Team player with a 'can-do' positive attitude
- Fluent in Mandarin and English (both spoken and written) for communication, interpersonal, organizational, and presentation skills
- Able to travel frequently
- Have a minimum of five years of related experience
- Familiar with Java and J2EE, Oracle / SQL Database
- Related Bachelor or Ph.D. degree

Epic Data provides the successful applicant with a competitive compensation package. We also provide our employees with a fun, exciting and very collaborative work environment. If you meet the above qualifications we would like to hear from you.

Please email your resume along with a cover letter to Ms. Gloria Ge, gloria.ge@epicdata.com. Only qualified applicants will be contacted.
